

INTERNATIONAL TRANSFER AND NETWORKING EVENT

Future Mobility

Within the framework of the EIT HEI Initiative for Entrepreneurial and Innovative Capacity Building, the *INTREPID-HEI* project is funded by the European Union and supported by EIT Urban Mobility. The project partners and especially the project leader and organiser OTH Regensburg would like to invite all interested parties to the international transfer and networking event *Future Mobility*. This will take place on site and, for those interested from more distant regions, simultaneously online. Future Mobility as an important guiding theme corresponds to the basis of the project consortium, which has the ambition to establish a European university with the vision of becoming the European Alliance on Sustainable Mobility (ERASMob).
